Cover letter

Dear Recruiter,

I'm writing to apply for this position.

I recently completed my master's degree in Medicinal Chemistry from the University of Pisa.

I completed my thesis internship in the Protein Design Lab at NEST (National Enterprise for nanoScience and nanoTechnology). I decided to write the final thesis in English (the subject was the treatment of recombinant proteins). During my studies, I also decided to carry out another internship where I learned how to write scientific protocols in English.

Currently, I'm studying Web Programming, Digital Marketing and Data Science with Start2impact, an Italian startup, to complete my skills and be more valuable for the job market.

I've attached my CV, which outlines my knowledge and my skills.

If interested, don't hesitate to contact me at lorenzomosti@gmail.com.

Kind regards,

Lorenzo

Experiences

THESIS WORKER – NEST, SCUOLA NORMALE SUPERIORE; PISA, PI - 06/2021-01/2022

The main subject was the computational analysis, the design, the expression, the purification, and the crystallization of proteins. In this experience, I also learned how to work in a lab and treat proteins.

TRAINEE – IVTECH; MASSAROSA, LU - 05/2021-08/2021

IVTech is an Italian biotech Startup that studies in-vitro models.

My job was to analyze the scientific literature and to write work protocols.

TRAINEE - MUNICIPAL PHARMACY; MASSA , MS - 08/2020 - 02/2021

Pharmacy management.

Education

Start2impact - 2022 - Now

Course FullStack Web Developer, Data Science and Digital Marketing.

Università di Pisa, Lungarno A. Pacinotti, 43, Pisa - 2015-2021

Master's Degree in Medical Chemistry

Voto: 110/110 with honor

Among all the subjects, I studied Bioinformatics and Computer-Aided Drug Design.

Skills

HTML/CSS, JavaScript, Python, NumPy, PCR, Chimera, Copywriting, Pandas.

Proactivity, Enthusiasm, Team Working.

Linguistic skills

English (C1), French (A2/B1), Spanish (A2/B1)
